INTRODUCTION

Chapter 1

Profitability analysis is a component of enterprise resources planning (ERP) that allows administrators to forecast the profitability of a proposal or optimize the profitability of an existing project. It is an analysis of the profitability of an organization output. Output of an organization can be grouped into products, customers, locations, channels, and transactions. Small scale industries have been playing a momentous role in overall economic development of a country like India where millions of people are unemployed or underemployed. Poverty and unemployment are two of the burning problems of the country today. This sector solves two problems through providing immediate large scale employment, with lower investments. According to Dr. MANMOHAN SINGH, "The key to our success in employment lies in the success of manufacturing in the small scale sector". The economic development of any country primarily depends upon the establishment of the industries, which require sufficient amount of capital. In a country like a India, where capital is scarce and unemployment is wide spread, growth of small scale industries is vital in order to achieve balanced economic growth. the strength of small scale enterprises lies in their wide spread dispersal in rural, semi urban areas, fostering entrepreneurial base, shorter gestation period, and equitable distribution of income and wealth.

Conclusion:

Fund is a life bloods of every organization in relation that management working efficiently. Regarding marketing potentiality of the organization are considered as the best effective tool which would bring about development for any organization. To become a successful firm, to service in the competitive world, it is essential to maintain and retain marketing position of an organization. Today money is not the sole factor monitoring market. Factor like modern marketing techniques growth affect organizational satisfaction. Good working condition is also essential to retain competitive employees and maintain good market position of the organization. A worker should not be considered just as an employee but as a "whole individual" who has to Balance both work and family life. Momin Pharma has got workers and working conditions, but if the suggestion given about are properly implemented it will become a leading industry in its field.
