Principal's Message:

Our college offers a degree program in Arts, Science and Commerce stream. All these courses are taught by experienced and dedicated faculty. At our college, we try to turn our students into useful components of our society. Along the way, we have realized that to enhance our students' job readiness, each student should undertake at least one Capacity development and skills enhancement program per semester along with their regular degree program.

Our experienced teachers have designed these courses to be especially relevant to each subject. We wish them all the very best!

About the course:

A course on the Statistical Package for the Social Sciences (SPSS) typically focuses on teaching participants how to use this powerful software for data analysis in social science research. This course is ideal for students, researchers, and professionals in social sciences, psychology, marketing, and other fields requiring statistical analysis.

Course Content

- 1.Introduction to SPSS:
- 2.Data Management:
- 3.Descriptive Statistics:
- 4.Inferential Statistics:
- 5.Advanced Statistical Techniques:
- 6.Data Visualization:

Objectives

- Develop proficiency in using SPSS for data analysis.
- Understand key statistical concepts and how to apply them in social science research.
- Learn to interpret and present statistical findings effectively.

Course Outcomes:

- Students' familiarity with the tool box of statistical software.
- Capacitating students in analyzing complex information with the help of statistical software
- Statistical Package for Social Sciences (SPSS). A strong theoretical and empirical foundation in statistical analysis.

Total Hours: 20

Module I: Introduction to SPSS (2Hours)

SPSS Environment: data editor, output viewer, syntax editor – Data view window – SPSS Syntax – Data creation – Importing data – Variable types in SPSS and Defining variables – Creating a Codebook in SPSS.

Module II: Working with Data (3 Hours)

Computing Variables - Recoding (Transforming) Variables: Recoding Categorical String Variables using Automatic Recode - Rank Cases - Sorting Data - Grouping or Splitting Data.

Module III: Exploring Data (5Hours)

Descriptive Statistics for Continuous Variables - The Explore procedure - Frequencies Procedure – Descriptives - Compare Means - Frequencies for Categorical Data.

Module IV: Analysing Data (10 Hours)

Inferential Statistics for Association: Pearson Correlation, Chi-square Test of Independence – Inferential Statistics for Comparing Means: One Sample t Test, Paired Samples T Test, Independent Samples T Test, One-Way ANOVA.

“SPSS” Training Program Report”

The training programme on SPSS (Statistical Package for Social Sciences) was organised under Department of PG (Commerce) for M.Com IV semester students from 06-05-2023 to 16-05-2023 under the guidance of Dr. Shaantashri Haridas.

About SPSS

SPSS is a comprehensive and flexible statistical analysis and data management solution. SPSS can take data from almost any type of file and use them to generate tabulated reports, charts, and plots of distributions and trends, descriptive statistics, and conduct complex statistical analyses. SPSS is available from several platforms; Windows, Macintosh, and the UNIX systems. SPSS customers in virtually every industry, including telecommunications, banking, finance, insurance, healthcare, manufacturing, retail, consumer packaged goods, higher education, government, and market research.

Objectives of Program

- Demonstration of SPSS as a data analysis tool.
- To analyse and reorganize information using SPSS.
- To integrate information and build models using SPSS.
- To carry out inferential statistical analysis using SPSS.
- To effectively summarize research findings and represent them graphically using SPSS.

Applications: SPSS finds applications in diverse fields including:

- Academic Research: Used extensively in social sciences, psychology, education, and healthcare research.
- Business and Market Research: Helps businesses analyze market trends, consumer behaviour, and make data-driven decisions.
- Healthcare: Used for clinical research, epidemiology, and healthcare analytics.
- Government and Non-Profit Organizations: Utilized for policy analysis, program evaluation, and public opinion research.
